

## Circulating Supply

### 7.3. Benefits of CRTX tokens and .crtx subdomains:

- 7.3.1. CRTX tokens are utility tokens for operating in the Cortex ecosystem.
- 7.3.2. Owning a subdomain under the .crtx TLD will enable users to have a globally unique set of unlimited addresses for creating, sharing and communicating around their content. It's a browser, content creation, social media and messaging application in one.
- 7.3.3. Yes, you can use emojis as part of your domain, or all of your domain.
- 7.3.4. Token holders will be able to pin data on IPFS.
- 7.3.5. Each domain within .crtx TLD is an NFT, an ERC-721 token that becomes an identity and place for owning, communicating, storing and using the Cortex app.
- 7.3.6. Owning this domain will not only provide you with a globally unique ID to interact and show what you own at a specific time, but the domain will also act as channels on which you can interact and with others.
- 7.3.7. This NFT can be sold like any other, but you can move your digital creations and assets elsewhere as needed.
- 7.3.8. Cross-chain functionality will be enabled.
- 7.3.9. Your identity is an NFT, but each key can also hold NFTs and showcase content and imagery around it. Many new ways to build structures of NFTs for sale, for personal airdrops, for just about anything.
